Product design and development (food)
Risk assessment
ISO9001
ISO17025
SJH (Indonesian Halal assurance system)
HACCP
GLP
GMP

Team leadership
Office administration
Data Analysis
Internal audit
Microsoft office
Time management
Multi-tasking
Computer proficiency
Instrument calibration

Education

University of New South Wales

Bachelor of Food Science and Technology

Jun2016 - Aug of 2019

(Honours) Course completed of note

Product Design & Development

Food toxicology

Nutrition

Commercial biotechnology

Advanced Food Chemistry

Unit operation in Food Processing

Advanced Food processing

Food Safety and Quality Assurance

Food Preservation

Food Science and Technology Laboratory

Bachelor of Science – major in material science and food science

Feb 2011-Jul2015

Kyushu University

2018-2019 Summer Semester

received JASSO scholarship based on academic merit

Project

Food Science and Technology Honours Thesis

A Comparison of Accuracy Between Finite Element Method (FEM) and Two-Layer Drying Model

- Utilize FEM program, and Microsoft Excel program tasked on calculate two-layer drying model to simulate the drying condition of coffee bean
- Extensive use of data analysis and error calculation to assess and compare accuracy.
- Conduct multiple parallel experiments as a countermeasure of the extended experiment time.
- Utilizing knowledge of each model characteristic to identify bug and error in the program used and create a temporary stop-gap solution to bypass the bug.

Experience

QA intern at PT. Pyridam Farma TBK Nov 2019 – nov 2019

- Create product dossier, Product Quality Review document and Quality Risk Management report
